

RA-1 Stereo Solid State Power Amplifier

Yes, it's solid state! With the success of our hybrid Class D integrated and power amps, it just seemed like a natural extension. And just like when we introduced the Sphinx integrated amp in 2012, we are lowering the entry point for a reference quality full-featured power amplifier. The RA-1 has an energy efficient "green" design requiring no tube biasing or regular maintenance.

Rogue has more than a decade of experience getting the absolute best sound from Class D amplifiers. The RA-1 will expand on that legacy. With our world class power supply implementation the RA-1 is an amplifier worthy of the Rogue name. The RA-1 is powerful, musical, and fully featured. There are both RCA and XLR inputs, it's bridgeable, and it includes a 12V input trigger. You get all this in an attractive 3/4 size chassis. You can be sure that you are investing in an amplifier that truly represents the very best in audio technology and value.

General Features:

- Accurate powerful UCD Hypex modules
- Massive linear power supply
- Balanced (XLR) and single ended (RCA) inputs
- Heavy-duty gold plated binding posts
- Short circuit protection
- Standby circuitry for reduced warm-up time
- Machined aluminum faceplate
- Heavy (2 ounce) copper circuit board
- All precision components
- Fully tested, burned in, and auditioned
- 3 year limited warranty electronics

Specifications:

- Output power: 175/275 WPC 8/4 Ohms
- Input impedance: 47K Ohms
- frequency response: 5Hz - 30KHz $\pm$ 1dB
- THD: <0.1% typ., <1.0% at rated power
- Input sensitivity: 1.0V RMS
- Dimensions: 15.25" W x 14.5" D x 5" H
- Power Requirements 120/240V – 50/60Hz
- Weight: 26 lbs
